

MTD8 Digital Programmable Timer

The MTD8 is a 30A 16 On/Off Digital Programmable Timer that is easy-to-use, quick to set and will maximize your savings. When installing the MTD8 for the first time, press the reset button to activate the timer. The introduction of a timer will improve your energy savings up to 66%. Switching the geyser off/on manually is not good practice as circuit breakers are not designed to be switched often and will eventually damage which can be costly to replace.

Features

- Repeat Programs with 16 ON/OFF Settings, 18 Pulse Settings, and a Manual ON/OFF Switch
- Countdown Mode
- Advanced Weekly Settings
- Din & Samite-Mini Rail Compatible
